

Thank you for buying Modular Horror Corridor!

Build spine-chilling corridors and immersive horror environments with **Modular Horror Corridor**, a high-quality asset pack designed for fast and flexible level creation. Perfect for horror, survival, and first-person exploration games.

Key Features

- **Fully Modular Design:** Prefabricated walls, floors, ceilings, and corners that seamlessly connect to create endless unique layouts.
- **Realistic PBR Textures:** High-quality materials that bring abandoned environments to life, featuring cracked walls, water damage, and eerie decay.
- **Atmospheric Props:** Rusted pipes, hanging cables, and other environmental details to enhance immersion.
- **Optimized for Performance:** Designed for PC, console, and VR, balancing high-quality visuals with smooth performance.

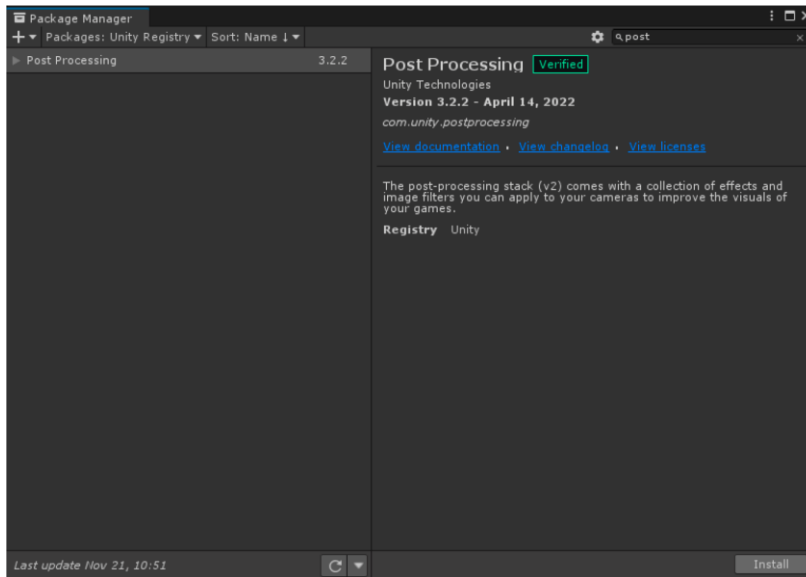

Perfect For

- Psychological horror games.
- First-person exploration and survival experiences.
- Escape room projects.
- Haunting settings like abandoned hospitals, secret laboratories, and underground facilities.

Built-in render pipeline:

To begin, we need to install the post-processing package. Let's click on Window > Package Manager. The Package Manager window will pop up.
